Town Officials at Church Last Sunday

Attend Gordon Memorial —Paster Gies Interesting Address

Members of the Town Council, the School Board and town officials who were present at Gordon Memorial church last Sunday heard an interesting sermon which included a number of practical and helpful suggestions. The preacher began his subject, "The Gates of the City," by stating that the church, although criticized sometimes for being other worldly, was interested inthe work of public bodies of the town and also in the men who were engaged in caring for the utilities of the town. He believed that no greater peril confronted the body politic than that of civic apathy and expressed the hope that both the school board and town council would go out f their way to keep the people informed about their work and problems. The publicatic of the minutes of all meetings would do much to foster and maintain public interest. The speaker drew attention to the origin and developmen of several official words and terms we use today. Board an Anglo Saxon word meaning table, hence applied to a group gathered kround the table. Mayor, from the Latin, Major, meaning greater o nobler. The Mayor of English municipalities has been elected by popular choice since the time of King John, but was originally called the port's reeve. Reefe, a word of Anglo Saxon origin, meaning one in authority, and porte from porta, the Latin word for gate. Therefore the term portsreeve meant the one in authority at the gate. In ancient times the elders o town council met at the gates of the gates of hecity. Therefore gates came to signify authority or power.

A verse from the book of Proverbs: "When the righteous are in authority the people rejoice," was quoted and those who occupied positions of trust urged to use the authority vested in their office so as to engender confidence and joy in the hearts of the people wh had called them into service.

In closing the speaker said he was sure it was the wish of a number of citizens that he time would soon come when the town would be able to have a park and also to erect a monument in honor of those who fell overseas. Such things would do much to stimulate interest and he felt sure all would co-operate to make both possible. He also thought it would be a good thing if all vacant buildings in town were either boarded up securely or torn down. Such would not only add to the appearance but would also, he thought, improve the morality of the town.

The church was well filled and the choir rendered special music for the occasion.

GORDON MEMORIAL NOTES

The last social event to be given in Gordon Memorial before Easter will take the form of a musical program and humorous play entitled "The Wrong Baby." This concert is being prepared by the intermediate group of C. G. I. T. and will be presented on Tuesday evening, March27th.

A new organization was launched last week by the junior boys of the Sunday school, which will be known as the "Wide-a-wake Comrades, unde the leadership of Mr. Jim Stratton a big brother. The boys appointed a full slate of officers and will announce their program occasionally.

Gordon Memorial had her part in the celebration of the DDiamond Jubilee of the Trinadad mission which was observed throughout the United Church of Canada on Sunday, March the 18th. At the morning service Miss Martha Balmer read a carefully prepared paper, giving some interesting facts about the history of the Island of Trinadad. The coming of the East Indian people and the beginning of the Canadian mission sixty years ago. The morning address told of the development and progress of the mission, the reception and report of the Canadian Mission to the Diamond Jubilee held in Trinadad during the month of January last.

Palm Sunday will be observed at both morning and evening services on April 1st. Morning subject: "The Triumphal Entry." Evening subject "The Prince of Peace."

During Passion week a service will be held each evening still FFriday which will take the form of a preparatory service, looking forward to the celebration of the sacrament of the Lord's Supper on easter Sunday morning. On Friday evenin g new members will ber received.

Next Sunday, March 25th, will bring to a close the series of addresses on the book of Proverbs. Morning subject "Friendship". Evening subje t: "To Ideal Woman."

Bad Prairie Fire in Box Springs District

Large Stretch of Prairie Burned and Twe Buildings Destroyed

Two small buildings and a strip of prairie five or six miles wide and possibly twice as long were bured by prairie fire which started yesterday morning near the Bedard Bros. farm in the Box Springs district. We are unable at the time of going to press to get any definite information as to the exact extent of the damage done, but judging from the reflection last evening quite a large stretch of country was swep by he fire. One small building on the Bedard Bros. homestead was destryed and another building near D. Williamson's was burned down. So far we have heard of no granaries or homes being destroyed nor of any persons being injured.

Mr. and Mrs. Joe. Dutton and child of Edmonton are spending a few weks in etown visiting the former's parents and other friends.

* * *

At the S.O.E. whist drive and dance held in Medicine Hat last evening, 4 of the 6 whist prizes were won by visitors from Redcliff, Mrs. N. Willis won first prize, Geo. Myers second and Mrs. Tester and W. Champ got the consolations. About twenty members from Redcliff lodge were present and they report a most enjoyable evening.

Celebration of Mass, Second and Fourth Sundays of each month at 8:30 a m

JOINT LODGES HOLD SUCCESSFULL EVENING

There was a good attendance at the whist drive and dance given last Friday evening under the auspices of the several lodges in town, and the event proved most njoyable and successful.

Mrs. Lakey won the ladies' first prize in the whist drive and Mrs. Podesta won second prize. For the gents E. Martin won first and G. Oakland se cond. Consolations went to Miss Kitchen and Mr. Reynas.

Following the whist the tables were removed and a few hours of dancing followed. During the evening lunch was prohibited and this was very ably managed by Mrs. Kitchen ,Mrs. Hill and Mrs. McLachlan, who undertook the task of making the necessary arrangements.

REV. HOLLINGER'C CORN CUPS ARE NOW ON EXHIBITION

The three silver cups wn by Rev. D. Hollinger at the orn show in Calgary last fall are now on exhibition in Hall's drug store window. One cup was donated by the Lethbridge Herald for the best ten ears of corn grown in Alberta. The second was from the Great West Saddlery for the best ten ears of Flint corn and the third from the Crystal Dairy for the bes sheaf of corn. They are hree fine cups and are being much admired by all who see them. By winning them Mr. Hollinger has brought distinction to the district.

DON'T FORGET THE FOOTBALL WHIST DRIVE AND DANCE IN CLIFF HALL FRIDAR NIGHT.

* * *

At the Liberal convention held in Medicine Hat last week, R. C. Hargrave was elected vice pres. of the provincial Liberal Association for this constituency. R. S. Hodge, T. Sneddon, D. Kerr and W. Campsan were elected members of the executive.

PRAIRIE FIRE WARNING

Too gre t care cannot be exercised by the people in both town and country in their use of fires this spring. For the first time in several years the heavy growth of grass, now dry as tinder, furnishes material fo a first class prairie fire. Had he fire which overran several sections west of here on Monday afternoon occurred during the high wind on Tuesday afternoon, one hesitates to contemplate the damage which would have ensued.

Within the town limits there is also danger. On T esday afternoon a fire started in some rubbish by children, broke away into the grass. Only the timely arrival of help prevented what threatened to develop into a serious situation.

Mr. and Mrs. W. Iampson entertained to bridge last evening. Among the guests were a number from Medicine Hat.

* * *

The Callies Football club of Medicine Hat has written the local club to try to make arrangements for a friendly game in the Hat on Good Friday. The officers would like to hear what the players think about it.

* * *

P. Campsan returned last week from Calgary where he had been undergoing treatment. He says he is feeling so much improved that he is going to try to eat h a place on the football team this season.

* * *

A meeting for the purpose of reorganizing the girls' baseball club for the season will be held at the home of May Oakland on Wednesday evening, March 28th at 8 o'clock. All interested are invited to attend.

* * *

The ladies of St. Mary's Church will hold a sale of home sewig and also serve afternoon te some time around Easter. Watch for the exact date.

Chinese Missionary Here Last Friday

Gave Interesting Addresses to Both Young and Old

Miss Florence Jack, a member of the West China Mission staff since 1915, delivered two inspring addresses here last Friday afternoon.

At 1:30 p. m. Miss Jack spoke to the ladies of Gordon Memorial church, making special reference to the work being done in that far off land by the Women's Missionary Society of the United church of Canada.

After school the girls of the Sunday school and C. G. I. T. groups came in. To them Miss Jack told the story of the building of a church tower in Chung King to house a bell presented to the congregation by friends in Canada. It was a most fascinating tale of devotion and self-sacrifice on the part of the Chinese christians. Miss Jack is enthusiastic about the Chinese people and also about he work being done by he Canadian church in the far interior province of Szechwan.

After the address the ladies served a dainty lunch and many had an opportunity of meeting the returned missionary whose visit all appreciated very much.

SECURE RATE ON ALBERTA COAL TO ONTARIO

Alberta coal is to be moved to Ontario in a further test movement at a trial rate o $6.75 per ton. This temporary rate, authorized by order-in-council, passed last Friday, and is to be effective for not leiss than three months in each of the next three years. The purpose of extending the test for a period of three years is in order that the Board of Railway Commissioners may have conclusive evidence of costs before them to enable them to give judgement.

J. J. Henbrick is Conservative Nominee

Was Chosen at Well Attended Meeting last FFriday Evening

At the Conservative convention held in Medi ine Hat last Friday evening, Mr. J. J. Hendrick was again the unanimous choice as the Conservative candidate for the approaching provincial by-election, caused by the death of the late C. S. Pingle. Mr. J. Currie was also nominated but withdrew in favor of Mr. Hendri k.

There was a large attendance present, all parts of the constituency being represented.

In opening the meeting Mr. Blackstock, who acted as chairman in the absence of the president and vice president, paid a high tribute to the late Capt. C. S. Pingle, whose sud and untimely death made necessary the calling of a by-election. "Before and on electionday," said Mr. Blackstock, "Mr Pingle was a Liberal," but on the day after the election he added on another qualification, he was the member for the Medicine Hat consaituency and as such he carried out his duties with fairness to everyone and very well indeed.

Messrs. E. L. Stone, V. Parish and W. Jamieson were appointed a resolution committee and they brought in the following resolutions which were unanimously adopted:

That the Conservative Association for the provincial constituency of Medicine Hat in convention assembled regret exceedingly the reason which makes necessary the holding of a by-election in this constituency at this time; hat this convention tenders to Mrs. Pingle its sincere sympathy for the loss she has sustained in the death of her husband, the late member of the constituency, and that this convention go on record in joining with the rest of the community in expressing its sincere regrets in the loss of so highly respected a citizen as the late Capt. C. S. Pingle; that this convention expresses confidence in, and endorses the leadership of Mr. A. A. McGillivray, leader of the Conservati. in the provincial legislature.

In accepting the nomination Mr. Hendrick thanked the convention for again selecting him. The large attendanie at the convention showed the people of the constituency were interested in the affairs of the province said Mr. Hendrick. He briefly alluded to the unsatisfactory financial condition in which the province now found itself after several years of Liberal and Farmer government, and said that the Conservative policy as annunciated by Mr. McGillivray was the only one that offered any relief from this appalling situation.

In closing Mr. Hendrick reminded old and young, male and female, of the tremendous influence each had at election time and it behooved them to use hat influence towards building up a better and more prosperous Alberta.

RUMOR OF ANOTHER CANDIDATE IN FIELD

The Conservative, Liberal and Labor parties now have candidates in the field for the approaching by-election in this constituency, and rumor has it that there will be still another entering the field as an Independent.

With three of the principle parties already represented and with the group government idea now on the wane it is hard to see just what can be gained by introducing another political group into our present provincial mix-up, unless it be a move to help elect one of the other candidates

"SHIELD OF HONOR" COMING TO DREAMLAND

One of the most thrilling pictures of the screen season is promised at the picture theatre on Thursday when "The Shield of Honor" opens its engagement there. This is a Universal production directed by Emmy Johnson a nd was written especially for the screen by his mother, Emilie John on, author of numerous successful pictures directed by him. It deals with the inside workings of the metropolitan police force and the cast embraces such players as Neil Hamilton ,Ralph Lewis, Dorothy Cadiver, Nigel Barrie Thelma Todd, Fred Esmelton and others.

Royal York Fast Reaching Skyward

Upper—Rapidly towering skywards to obtain the title of the tallest building in the British Empire. Lower Right—How the Royal York Hotel will look when completed. Photographed from a scale model. Lower Left—Showing the thickness of the huge iron girders, said to be the heaviest used in Canada.

Work on the Royal York, the new Canadian Pacific Hotel being erected at Toronto is at least ten days ahead of its schedule. It was only in September that the razing of the old Queen's Hotel and the other buildings on the property began, and a battery of steam shovels were turned in on the task of taking out the excavation. The latter was no small job. The area of the hole required was about 340 yards by about 194 and its depth averaged somewhere between 23 and 24 feet while the soil excavated amounted to over 50,000 cubic yards. There is now every hope that the building will be completed by May 1st, 1929. It will rise 305 feet above the sidewalk, thus being the tallest building in the British Empire, that title now being held by the Royal Bank of Montreal which towers 292 feet above the street. The furnishing and equipment of the hotel will not a new standard, and a small army of designers are busy preparing plans for the decorations and furnishings.

The tunnel entrance to the hotel from the Union Station will open on the floor immediately under the concourse and will be opposite the passage-way through which arriving travelers leave the trains. It will pass under Front Street to the south-east corner of the hotel entering the building on what might be termed the ground floor, although its floor level is slightly below that of the street. The main feature of this floor will be a large exhibition arcade which will be one of the outstanding features of the hotel. Here will also be a coffee room, grill and barber-shop, and around the sides will be a number of shops each with a display window on the street. In the south-east corner will be a bank, and the remainder of the space will be taken up with store-rooms and service equipment.

The main, or lobby floor will have the main entrance of the hotel on Front Street, and another entrance on the east side. In the centre of this floor will be a large lobby containing the hotel offices and ten passenger elevators. To the right will be writing rooms, cafe and news stand, and to the left a large lounge opening on to the main dining room which will extend pretty well the entire length of the hotel's frontage on York Street. This room, like the lounge and lobby will be two storeys in height with the galleries of the mezzanine floor above.

RED ROSE TEA "is good tea"

Red Rose Orange Pekoe is supreme

In clean, bright Aluminum.

A Forward Step

The development and growth of Canada politically, economically, in commerce and finance, in production from its natural resources of the field, the forest, the mine, and the waters of the Dominion has, during the first sixty years of Confederation, been most gratifying. This is now fairly generally recognized. It is also the general belief that Canada is just entering upon a still greater era of expansion and development in many directions leading to a greater growth and larger prosperity.

The question, however, which, to an increasing extent, is calling for serious consideration is: What policies should be adopted and steps taken to ensure that this future development shall proceed along lines that will result in building up a strong nation, and in such a way that maximum benefits from such development shall accrue to the whole people of the Dominion?

During the pioneer stage in any country's development it is inevitable that its people devote their energies largely to the production of primary articles, largely raw materials. But with increase in population, the provision of adequate means of transportation, and the accumulation of wealth, a country should move forward in the work of not only producing such raw materials in increasing quantities but in utilizing them in the manufacture of finished articles.

It is important that crude methods in production of raw materials be discarded for those best calculated to give larger quantities, better qualities, and at lower costs; that all possible waste be eliminated; that as many by-products as possible be reclaimed, and that use be made of low-grade and off-grade materials. It is perhaps of even greater importance to ascertain the nature of pests and other agencies which now operate to destroy our raw materials at their source, and to discover effective means for their eradication."

The discovery of all these things can best be brought about through the painstaking effort of the expert in scientific research. Such work may require years of study, investigation and experiment. In many, perhaps most, cases it will call for laboratory and other expensive equipment. In the past Canadians have not fully appreciated the importance of such work, and as a consequence have not been prepared to provide the necessary public funds to carry it on. As a people we have been so busy attending to our own particular problems, and demanding immediate solutions of them, that we have been impatient of ideas based on long and expensive scientific research. As a result, Canada today lags behind other nations in this respect, nations which have not nearly the wealth of natural resources calling for development which Canada possesses.

It is, therefore, highly gratifying to learn of the action of the House of Commons in unanimously adopting a resolution favoring the establishment of a National Research Institute by the Dominion Government, and of announcement by the Government of its intention to proceed with the erection of the first wing of a National Research Institute building on a ten acre plot at the central experimental farm at Ottawa.

Last year, it is stated, Canada spent $250,000 for research as compared with $50,000,000 by the United States, and $25,000,000 by Great Britain. This year the Government will, on the recommendation of the Research Council, increase the vote for research work to $750,000, and the Minister estimated that three million dollars would be required during the next five or ten years to construct and develop laboratories.

In this way the splendid work initiated by many of our Canadian universities, assisted by private capital, will be supplemented, and the whole work of research in Canada co-ordinated and developed. When it is realized that Canada is estimated to be losing at least twenty million dollars a year through grain rust alone, the possibilities of gigantic gain through research work can be grasped. A few millions a year spent on research work may easily mean a gain of ten times as many millions through discoveries made.

Preparing Reception For British Party

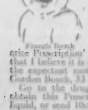
Empire Parliamentary Association To Visit Canada This Summer

Details for the reception this summer of the Empire parliamentary association are now being completed. It is understood that a party of about 50 members of parliament from Great Britain will take part in the tour of Canada, accompanied by some members of the parliament of Canada.

The British party will arrive in Quebec on August 25. They will visit Montreal, Toronto, Niagara Falls and spend two days in Winnipeg about September 4 or 5. Saskatoon, Edmonton, Jasper, Vancouver, and Victoria are included in the trip West. Coming East there will be visits to Lake Louise, Banff, and to the RP Ranch near High River, Calgary and Regina.

According to Pliny, Cato believed that husbands started kissing in order to determine whether their wives and daughters had been drinking wine.

"A Babe in the House is a Well-spring of Pleasure."



St. Catharines, Ont.—"During motherhood I was all rundown, nervous and weak, when, upon the advice, I began taking Dr. Pierce's Favorite Prescription. It strengthened me, quieted my nerves and I had no more trouble. I kept well and had a fine, big, healthy baby—he has scarcely had a day's sickness. The 'Favorite Prescription' was so helpful to me that I believe it is the only medicine for the expectant mother to take."—Mrs. Gordon Bourk, 13 Valley St.

Go to the drug store at once and obtain this Prescription in tablets or liquid, or send 10c to Dr. Pierce's Laboratory in Bridgeburg, Ont., for a trial package of tablets.

Prince Has New Title

Asked To Assume Title Of Master Of the Merchant Navy

The Prince of Wales has an addition to his already numerous titles. King George having asked him to assume the title of Master of the Merchant Navy and Fishing Fleet.

His Majesty has been for some time considering what steps can be taken to bring the merchant navy and fishing fleet into line with other great services of the Empire by having as the titular head some member of the royal family.

Persistent Asthma. — A most distressing characteristic of this debilitating disease, is the persistence with which recurring attacks come to sap away strength and leave the sufferer in a state of almost continual exhaustion. No wiser precaution can be taken than that of keeping at hand a supply of Dr. J. D. Kellogg's Asthma Remedy, famous as the most potent remedy for eradicating the disease from the tender air passages.

A Courteous Hint

Michael Arlen is the hero of the following story. Some time ago he was invited to spend four days at a beautiful old-world castle in the south of England. Mr. Arlen was so charmed with the place that he remained for a week. One morning the butler presented himself with—"A compliments, sir, and would you like a book?" The novelist promptly replied that he would. The book arrived with almost equal promptitude. It was a railway time table!

Youth is unreasonable as long as it remains youth. The curious thing is that when it passes over into middle age it is at once very much surprised to find that youth is still unreasonable.

Japan has converted an antiquated warship into a naval museum.

Minard's Liniment relieves pain.

Discuss Coal Subsidy

Subsidy To Railways For Transporting Alberta Coal Should Come From Dominion Government

Any subsidy to the railways for transporting Alberta coal to Ontario should come from the Dominion Government and not from Ontario, said Premier G. H. Ferguson in the Ontario legislature, in reply to a question of J. G. Lethbridge, Progressive leader.

Mr. Lethbridge asked what the attitude of the government was in view of recent suggestions made in the press. Mr. Ferguson pointed out that the railways wanted $9 a ton where as the actual cost as determined by the railway board was $7. The real cost, he thought, was nearer $6.75. There was a suggestion, said the premier, that if the Dominion Government would contribute a subsidy of $1 a ton, the province of Ontario and Quebec should join in providing another dollar.

HOW DELICATE GIRLS ARE MADE STRONG

Rich, Red Blood Needed To Keep Up Their Vitality

It should be borne in mind that pale, bloodless girls need plenty of nourishment, plenty of sleep and regular out-of-doors exercise, but a lack of appetite and tired, aching limbs tend to hinder progress. To save the weak, thin-blooded sufferer, she must have new, rich blood, and nothing meets a case of this kind so well as Dr. Williams' Pink Pills. These pills not only enrich and increase the blood supply, they help the appetite and aid digestion, relieve the weary back and limbs, thus bringing new health and strength and transforming anaemic girls and women into cheerful, happy people.

The value of Dr. Williams' Pink Pills in the case of anaemic girls is proved by the case of Miss Lucy Stoddart, Margaretville, N.S., who says: "From the age of 12 to 15, I was in an anaemic condition. I was very thin and nervous, had no appetite and had no desire to take part in the doings of those of my age. My mother got tonic after tonic for me, but they did me very little good. Then Dr. Williams' Pink Pills were recommended and almost from the first they seemed to be just what was needed to restore my strength. After using the pills for a time I felt an altogether different girl. I got up in the morning feeling bright and active, and ready for work or play. Since then I have always taken a couple of boxes of Dr. Williams' Pink Pills in the spring as a tonic and they thus kept in the best of condition."

Every weak girl should promptly follow the example of Miss Stoddart, feeling sure that the pills will renew her health. You can get the pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Book On Manitoba Place Names

National Geographic Board Has This Work In Hand

The National Geographic Board will commence immediately to gather information for a booklet on place names in Manitoba. A booklet covering Alberta is now on the press and will be issued in a few days.

R. Douglas, the secretary of the board, stated that the Manitoba booklet will cover the lakes, rivers, cities, towns and historic sites of the province, giving the derivation of each name. W. J. Healy, the provincial librarian, is the Manitoba representative on the board and will assist in the work, which, it is expected, will require about one year.

The most obstinate corns fail to resist Holloway's Corn Remover. Try it.

Polly: "Did you see the aurora borealis last night?"

Dolly: "No, I haven't been to a show all week."

The boiling of water removes very few of its chemical impurities, but it does kill the germs.

The "Flu" LEFT HER WITH A VERY WEAK HEART

Mrs. Beulah Demaine, Pleasant River, N.S., writes:—"Having suffered with the 'flu' a few years ago, I was left with a very weak heart.

"I was unable to go about, and could not do my housework.

"I would get dizzy spells and would have to sit and lie down.

"I could not sleep at night as the least little noise would wake me up.

"I tried different kinds of medicine, but they seemed to do me no good.

"A friend recommended

I have used five boxes and am much better; do not get those dizzy spells, and can do my own work as well as ever."

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Widen Income Tax Scope

Speculation Profits On Grain Or Stocks To Be Subject To Tax

Broadening the principle laid down in the case of Allan Morrison versus the Crown, in which the court held that income derived from speculation on the grain exchange was taxable under the Income Tax Act, the income tax department intends to levy tribute upon profits made from speculation, whether on grain or stocks.

This announcement was made by the department and it was further stated that the tax would apply upon profits made in the calendar year 1927. It is expected that some $50,000,000 additional income will be brought under the tax annually, and since much of it runs to high amounts per individual, the increase in the receipts of the government may well approximate $5,000,000 per annum.

Those who speculate only occasionally will not be subject to the levy, but all who make a business of it, notwithstanding the fact that they may be at work daily in other businesses, will be considered taxable.

Prevent Level Crossing Accidents

New Legislation Introduced In Saskatchewan House With This Object In View

Complete accord by all parties in the Saskatchewan Legislature was expressed on the proposed amendments to the Vehicle Act which have to do with autoists bringing their cars to a complete stop at railway level crossings or where stop signals are erected, before attempting to make a crossing.

The amendment was introduced by Hon. S. J. Latta, provincial secretary, as an attempt to eliminate level crossing accidents.

The Saskatchewan gasoline tax bill, introduced by Hon. S. J. Latta, calls for a tax of three cents on each gallon of gasoline sold, and will come into force May 1.

A River That Burns

Stream Of Water In France Was Ignited By Match

A burning river and a buried forest were the unexpected rewards of men digging for springs in the interest of the water supply of Coreno, France. Instead of a spring they discovered a stream of water which bubbled like champagne.

When a match was thrown into the water it caught fire and burned for several hours.

The source of the gas was found by sinking a shaft 100 feet where giant oaks and pines were discovered decomposed, remains of a forest supposed to have been buried hundreds of years ago by a landslide.

Its Quality Sells It.—The fact that so many thousands of intelligent people continue to use Dr. Thomas' Eclectric Oil speaks volumes for its healing efficiency. Ever since it was first introduced it has grown steadily in public favor, owing entirely to its manifold usefulness in relieving and healing purposes. As a specific for cuts, burns, scalds, and various inflammatory pains its record is beyond reproach.

Recipes For This Week

(By Betty Barclay)

LAMB MENAGERE
(Thrifty Housewife's Lamb Ramekins)

½ cup sweetened condensed milk.
2 cups cold lamb, minced.
1 teaspoon salt (scant).
¼ teaspoon white pepper.
2 tablespoons chopped green peppers.
1 tablespoon chopped onions.
2 tablespoons hot water.
2 tablespoons bread crumbs.
1 tablespoon butter.

Mix sweetened condensed milk with water and stir into minced lamb. Add salt, pepper, chopped onion and green peppers. Put into buttered ramekins. Melt butter; mix with bread crumbs and sprinkle over meat. Bake in a moderate oven (350 degrees Fahrenheit) for about 20 minutes, or until well browned.

CUSTARD SOUFFLE

3 tablespoons butter.
¼ cup flour.
½ cup sugar.
1 cup scalded milk.
4 eggs.
½ teaspoon salt.

Melt butter, add flour, and gradually hot milk. Bring to boiling point and pour on to yolks of eggs beaten until thick and lemon-colored, mixed with sugar and salt. Cool. Fold in whites of eggs beaten stiff. Turn into buttered dish, and bake from 30 to 35 minutes in slow oven. Take from oven and serve at once. Serve with hard sauce, whipped or plain cream.

Minard's Liniment for sick animals.

CUTICURA Promotes Loveliness Of Skin And Hair

Daily use of the Soap, assisted by the Ointment when required, keeps the skin fresh and clear and the hair healthy and glossy. They are ideal for the toilet, as is also the smooth, cooling, fragrant Cuticura Talcum.

Soap 25c. Ointment 25 and 50c. Talcum 25c. Sample Each Free by Mail. Address Canadian Depot: "Cuticura Laboratories, Limited, Montreal." Cuticura Shaving Stick 25c.

HERCULES TRADE MARK

PERMANENT BUILDING PAPER

What's between Indoors and Outdoors?

The world is divided into two parts, outdoors and indoors. Between the two lies a problem. The answer has a vital effect on those who are indoors.

If wind and dampness can be kept outdoors, naturally indoors will be comfortable and healthful to the occupants.

You can solve this problem with Hercules Permanent Building Paper. In three grades, 2, 3, 4—Hercules is tested and proven damp proof and wind proof. Test it yourself. A line will bring samples. Write us.

U.S. Legation At Ottawa

Residence For Minister From United States To Be Erected

Hon. Frank B. Kellogg, United States Secretary of State, after a visit to Ottawa as a guest of the Canadian Government, announced in an interview that it was expected that the United States would erect a residence for the United States minister and an office building for the legation staff in the city section of Ottawa. Arrangements as to location would, he said, be in the hands of the United States Minister to Canada, the Hon. Wm. Phillips.

All mothers can put away anxiety regarding their suffering children when they have Mother Graves' Worm Exterminator to give relief. Its effects are sure and lasting.

Car Salesman—"And the price is within easy reach."

Victim—"Show me where to reach and I'll grab it."

A cynic is a person who knows the price of everything and the value of nothing.

The whole world knows Aspirin as an effective antidote for pain. *But it's just as important to know that there is only one genuine Aspirin.* The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any drugstore—with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While as is well known that Aspirin means Bayer manufacture, to insure the public against imitation, the Tablets will be stamped with their "Bayer Cross" trademark.

Protecting B.C. Fruit Crop

Counter-Parasites Are Being Imported Into Orchard Regions

Bug will fight bug this season to protect the Okanagan fruit crop from destruction. Counter-parasites are being imported into the orchard regions in a campaign to decimate the codling moth and earwig.

The counter-parasites, according to E. R. Buckle, provincial entomologist at Vernon, will be obtained from Wenatchee, Wash., the United States government having offered to co-operate fully with the British Columbia authorities. Parasites inimical to the codling moth and earwig have done effective work in the past, although they have to be handled with a great deal more care because of the danger of introducing secondary pests with them.

Unless the codling moth is suppressed, growers fear that it may bring about destruction as extensive as in the state of Washington, where losses due to the activity of this pest were $5,000,000 in 1926. Eight hundred carloads of apples were classified as culls in the Yakima district for same reason.

Pleased With Visit

Kellogg Says Ottawa Visit Was Most Enjoyable He Ever Spent

Secretary of State Frank B. Kellogg, on his return to Washington, from his trip to Canada, said he never enjoyed a visit more in his life. Speaking of his reception at Ottawa, the secretary said that while Canadian hospitality was proverbial the manner in which he was received by the governor-general, Viscount Willingdon; the prime minster, Rt. Hon. W. L. Mackenzie King, and the officials and members of parliament, had been beyond his anticipation. The secretary was particularly interested in the Achives building at Ottawa, which he thought was one of the most interesting exhibits in the world.

FACES ACROSS THE SEA

Image Of Woman Transmitted By Television For First Time

New worlds were opened up when faces were flashed across the sea by television in a way which was never foreseen even by Jules Verne in all his fanciful imagination. For the very first time the image of a woman was sent across despite the fact she felt her position in front of the transmitter a few seconds to glance in a wall mirror to make certain her hair had not become mussed in the excitement. Dummies and men's faces had been flashed across in previous tests but never a woman. John L. Baird, inventor of the televisor explained he had difficulty in finding a woman willing to attempt to sit still for twenty minutes or half an hour. The transmission was accomplished from Baird's Television laboratories in London, direct into the receiving station at Hartsdale, New York, which had been rigged up for the occasion.

Baird himself was the first sitter before the transmitter. Afterward, W. C. Cox, of the London Press Association sat for half an hour. Reports came back from the United States that Fox was showing up well. Then Mrs. Howe, wife of James Howe, of the London Bureau of the Associated Press, took her seat in front of the seventeen glaring incandescent lamps, of 300 candlepower each.

Baird was as excited as a boy when he heard detailed reports of the reception in the United States of the image of Mrs. Howe.

"Indeed I was delighted," Baird said. "It was a splendid demonstration as far as the subjects on this side were concerned. These tests are merely try outs of the unlimited television possibilities of the near future."

"It was the greatest thrill of my life when Mr. Baird told me my image had been seen on the other side of the Atlantic," Mrs. Howe said. "The glare and heat of the electric lights bothered me only a trifle—I was too thrilled at the novelty of it all to think of the temporary discomfort."

MANY MOTHERS RECOMMEND THEM

Baby's Own Tablets Are Fine For Nervous, Sleepless Children

From Canada the fame of Baby's Own Tablets is spreading over the world. Mothers recommend them to other mothers and wherever they are tried nothing but words of praise are heard for these pleasant tasting little tablets that promptly relieve the minor ailments of young children.

"Baby's Own Tablets are one of the best remedies for children's ailments I have ever used," says Mrs. Arthur T. Allen, of Auburn, Me., "My little girl was nervous and could not sleep. I tried the Tablets and she was relieved at once. She was also troubled with constipation and nothing seemed to help her. I had used the Tablets but a short time before her bowels were regular. All mothers should keep Baby's Own Tablets in the house for they are a valuable remedy."

Baby's Own Tablets are sold by all druggists or will be mailed on receipt of price, 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont.

Federal Grants For Fairs

Policy Of Government Should Be Better Defined

Western members of parliament are in receipt of telegrams almost daily from constituents in regard to the federal grants to class B fairs, and there is every indication that the policy of the government in this regard will be a subject of keen controversy in the present session.

The difficulty arises out of the manner in which the grants are given. Some fairs receive assistance and others do not, and the government hitherto has declined to base the assistance upon any principle. Western members declare that the grants should be given to all fairs which can qualify as class B, or discontinued entirely.

Noted Indian Chief Dead

Narrowly Escaped Being Buried Alive 25 Years Ago

Moses Brown, noted Indian chief of the Chehalis Reserve, B.C., is dead and buried and this time, his fellow-tribesmen say, the old man is not likely to rise again.

The chief was almost buried alive 35 years ago. For two days the Indian villagers thought he was dead as a result of an accident. They placed the body in a coffin, performed the usual tribal funeral rites, and set out for the burial ground. When the coffin was being lowered into the grave it accidentally jarred against the bottom and the sudden jolt brought the occupant back to consciousness.

Realizing that he was imprisoned, Moses began to beat furiously on the coffin, which was immediately broken open by the astonished Indians. The man supposedly dead walked home with the mourners, apparently none the worse for his experience.

The dead chief served the provincial and federal governments as a guide for years and as a boy accompanied many prospecting parties into the Cariboo during the gold rush. He was the only full-blooded Indian ever employed as a bartender in British Columbia. That was in New Westminster in the early days of the province.

Besides being known as a great medicine man among the Indians, Chief Moses was well educated. He could speak, read and write fluently, and also had a good knowledge of French, Spanish and Chinese.

Truth About Cancer

"Neither X-rays nor radium has ever cured, or will ever prove of service, as a cure of cancer. For of both of these appliances I have had ample experence."

"It is no use experimenting upon a disease unless we first of all know something of its natural history; and yet the general concensus of opinion amongst surgeons, which they have no hesitation in circulating, is that the cause of cancer is not known. Yet they continue to treat it by methods that apply only to a local outcrop, which, much to my regret, I was guilty of doing for a number of years before my eyes were opened to the folly of it."

"The fact remains that operative treatment for cancer has been practised from time immemorial and from my knowledge of the disease I affirm that the knife has never cured cancer in a single instance; but, on the contrary, has only succeeded in aggravating the disease and adding to the sufferings of the poor patient; and also shortening his or her life, which latter, perhaps, might be looked upon as a godsend in the circumstances."

"Now cancer is a blood disease—and there is no gainsaying this—the local manifestation being merely an outcrop of the malady, the cause being prolonged toxic condition of the blood."

Love of humanity and truth impelled the internationally celebrated British cancer surgeon Dr. Robert Bell, M.D., F.R.C.P.S., &c., to abandon his lucrative surgical practice and, with convincing proofs of his above quoted statements this eminent authority successfully opposed and refuted the modern orthodox methods of treating the deadliest known disease.

Before passing at an advanced age in 1926, wishing to ameliorate the condition of cancer sufferers in Canada and the United States, Dr. Robert Bell kindly authorized the writer to use his printed works and personal letters in humanity's service and a book of valuable information concerning prevention and treatment of cancer without surgical operation, radium or X-ray tortures or expense can be obtained, without charge, on application to Charles Walter, 51 Brunswick Avenue, Toronto, 4, Ontario, Canada.

A Parisian poet, Louis Lolgara, entered a cage of wild lions and read his poems for half an hour. The lions seemed unharmed.

The man who has millions today doesn't control a single minute of tomorrow.

If you're not up and doing, you're down and being done.

Source Is Still Unknown

"Cosmic Rays" Have Baffled Scientists For Many Years

Rays from the Milky Way with more than 30 times the penetrating power of X-rays, and which have baffled scientists for more than 20 years since they were first suspected, have now been described by Professor Millikan and Dr. Cameron, of Saskatoon.

The inference made is that they searched the universe in an attempt to determine the source of these rays which are called "cosmic rays." They describe their latest attempts in California and on the heights of the Andes mountains in South America. They have tested the light from the stars without result. They have found no effect from the sun, and they have gathered nothing from their trials in interstellar space.

The inference made is that the rays come to the earth from the edge of the universe, far beyond the ring formed by the Milky Way, and had their origin 1,000,000,000 light years ago. The rays are believed to be electrical in origin, but to produce rays with the same penetrative power would require an electro-motive force of 41,000,000 volts.

While a fairly thick coating of lead is impenetrable to X-rays, the cosmic rays can be detected behind a lead screen up to 16.7 feet thick, and to a depth of 190 feet of water.

Alberta Liquor Profits

Profits Of Over Two Million Dollars On Government Sale Of Liquor

Net profits of $2,038,622 on government sale of liquor were made in Alberta last year, according to the report of the Liquor Control Board which was laid on the table of the House at Edmonton.

The report, covering the full calendar year of 1927, shows an increase of $235,070 over the preceding year's profits. Gross sales amounted to $4,-856,849.

Improvement is noted in respect to violations of the liquor law. All convictions totalled 2,450, a decline of 359. The convictions for drunkenness were 1,065, or 117 less than the year before.

Law enforcement was strictly carried out and the officers on that work travelled 130,000 miles.

The cost of law enforcement of the liquor laws was $100,626. Excellent co-operation from the municipal and Dominion police was reported.

That Alberta's liquor business has made a satisfactory contribution to the Dominion treasury is indicated by the report which puts the amount paid to the Federal government by the board and brewers of the province at $2,454,000. This amount was paid in customs and excise duties, sales tax, etc.

CREAM OF TOMATO SOUP

- 2½ cups canned or fresh cooked tomatoes.
- ¼ small onion, sliced.
- 1 stalk celery, minced.
- 1 tablespoon minced parsley.
- ½ bay leaf.
- 2 whole cloves.
- 1 teaspoon salt.
- ⅛ teaspoon pepper.
- 1 teaspoon sugar.
- ¼ teaspoon soda.
- 2 tablespoons butter.
- 2 tablespoons flour.
- 1½ cups Borden's St. Charles Milk.
- 1½ cups water.

Add seasoning to tomatoes and simmer fifteen minutes, strain.

Melt butter in saucepan, stir in flour. Dilute milk with water, pour slowly into butter and flour, stirring until it thickens. Continue to cook five minutes. Just before serving, add soda to tomatoes, gradually add tomatoes to white sauce, stirring constantly, serve immediately.

All or any of the vegetable seasonings may be omitted, but their addition gives a smooth, well-blended flavor to the soup.

How She Saved

A poor blind woman in Ireland put ten shillings into a plate at a missionary meeting. "You cannot afford so much," said one. "Yes, I can," she answered. On being pressed to explain, she said, "I am blind, and I asked my neighbor how much money he spent for oil in his lamps in a year. He replied "Ten Shillings." So I found that I have saved so much because I am blind, and do not need a lamp and I give it to shed light to heathen lands."

Back Seat Record

He had just bought a car. His wife went with him on a few expeditions, and did not hesitate to criticize her husband's driving.

"Hello, old man!" said a neighbor one evening. "I see you've got a car. What do you get out of her?"

"About 40,000 words to the gallon," answered the husband.

Some folks persist that a healthy baby should be a delicate pink. Too many of them are robust yellers.

Woodsmen—Keep Minard's handy.

CANCER

Great Success of Cantassium Treatment

A well-known London surgeon and recognized authority on Cancer has created world-wide interest in the discovery that Cancer is due to a deficiency of potassium "salts" in the body, which causes the cells to break down and become malignant.

In order that every one may learn

The Real Cause of Cancer

a remarkable book has been specially written.

This book will be sent free to patients or any one who is interested in the most successful method of fighting "THE CANCER SOURCE."

The following is a list of the chapters:

1. The Limitations of Surgery; 2. Some Doctors Oppose Operation; 3. What Cancer Is; 4. Why the BODY CELLS BREAK DOWN; 5. Injurious Cooking Methods; 6. Common Errors in Diet; 7. Vital Elements of Food; 8. Medical Endorsements of Our Claim; 9. The Chief Minerals of the Body; 10. The Thymus Gland; 11 Age When Lime Begins to Accumulate; 12. Potassium Causes Lime Excretion; 13. Great Value of Potassium; 14. Parts of the Body Liable to Cancer; 15. Parts Which Are Seldom Affected; 16. How a Doctor Can Help; 17. How to Avoid Cancer; 18. Death-rate From Cancer; 19. Arterial Sclerosis and Old Age; 20. Rheumatism, Gout and Kindred Complaints.

With this book are a number of interesting case-reports proving the great value of "Cantassium Treatment" in various cases. The treatment is simple and inexpensive, and can be easily taken in one's own home. Apply for free book to Charles Walter, 51 Brunswick Avenue, Toronto, Ontario, Canada.

Planning First Air Cruise

Keen Interest Taken In Flight Being Arranged by Imperial Airways

The first aerial cruise in the history of the world will leave Croydon aerodrome shortly, carrying 12 passengers on a de luxe 35-day tour of France, Spain, Northern Africa, Sicily, and Italy.

Keen interest is being manifest in the epochal flight which is being arranged by the Imperial Airways and a number of Americans have requested permission to join the cruise.

Luxurious service on board the plane will be a feature of the trip, the crew, including pilot, pilot engineer, and steward. Luncheons as well as afternoon tea will be served on board the plane, and passengers will have a first class buffet at their disposal.

This first air cruise in the world will include a distance of 5,500 miles by air, in addition to hundreds of miles by car, all of which has been arranged by the directors of the tour.

Doctor—About nine patients out of ten don't live through this operation. Is there anything I can do for you before we begin?

Dusky Patient—Yassah. Kindly hand me mah hat.

The BABY

Why do so many, many babies of today escape all the little fretful spells and infantile ailments that used to worry mothers through the day, and keep them up half the night?

If you don't know the answer, you haven't discovered pure, harmless Castoria. It is sweet to the taste, and sweet in the little stomach. And its gentle influence seems felt all through the tiny system. Not even a distasteful dose of castor oil does so much good.

Fletcher's Castoria is purely vegetable, so you may give it freely, at first sign of colic; or constipation; or diarrhea. Or those many times when you just don't know what is the matter. For real sickness, call the doctor, always. At other times, a few drops of Fletcher's Castoria.

The doctor often tells you to do just that; and always says Fletcher's. Other preparations may be just as pure, just as free from dangerous drugs, but why experiment? Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold!

Children Cry for Fletcher's CASTORIA

Institute For Research Work

Federal Government Favors Immediate Forward Movement

Without dividing, the House adopted a resolution, moved by E. J. Garland (U.F.A., Bow River), favoring the establishing of a national research institute by the Dominion Government. During discussion Hon. James Malcolm, Minister of Trade and Commerce, announced the Government intended to proceed with the building of the first wing of a national research institute on a tenacre plot at the Ottawa experimental farm. Hon. R. B. Bennett, Opposition leader, urged care should be taken to see there was no duplication of activities in research work.

Canada should develop her industries through the establishment of a national research institute under the Dominion Government, Mr. Garland declared in supporting the resolution.

"We have the brains in this country but we haven't learned to apply them to scientific research," said Mr. Garland.

No problem was more serious in Canada today than the "gigantic annual loss" from grain rusts estimated at approximately $30,000,000 a year. We need a bureau of standards, scientific research, co-ordination of research and the results of these efforts should be freely available. Last year Canada spent $250,000 for research, the United States $50,000,000 and Great Britain $25,000,000.

Hon. Mr. Malcolm believed a "public consciousness" had been awakened to such an extent as to justify an immediate forward movement in the work of research.

The amount of $750,000 provided in the estimates, said Mr. Malcolm, had been suggested by the national research council. After going over the whole situation with the research council, Mr. Malcolm estimated that $3,000,000 would be required during the next five or ten years in order to construct and develop laboratories in Ottawa. The research council had been of the opinion that the first year's program would not necessitate any possible expenditure in excess of $750,000.

The research council had recommended an annual increase from $170,000 to $300,000 for administration and the suggestion would be carried out.

"The building up of a trained staff to operate the laboratories will require time and will be a progressive affair," said Mr. Malcolm. Private research in Canada had done "valuable work." In respect to the research work being performed by various departments of the Government, there would be a gradual amalgamation of effort.

Lord Robert's Retort

Famous General Had Ready Answer For Would Be Wit

Lord Roberts once found himself among new friends in a London club. There was a very tall man present, who evidently believing himself to shine as a wit, seized every opportunity of raising a laugh at other people's expense. On being introduced to Lord Roberts, the wit bent down patronizingly to his lordship and remarked: "I have often heard of you, but—" shading his eyes with one hand, as though the famous general, being so small, could be seen with difficulty—"I have never seen you." To this Lord Roberts promptly replied: "I have often seen you, sir, but I have never heard of you."

Father: "Well, daughter, what did you learn in Sunday School today?"

Little Elsie: "That Susie Jones is going to have a party.

On July 4, 1894, there was but one practical automobile in the world.

"For a year I have been trying to get payment from you for that suit, and now it is nearly worn out."

"Fancy asking me to pay that much money for a worn-out suit!" — Moustique, Charleroi.

CHINESE FOND OF DRAMA

Plays Written Hundreds Of Years Ago Are Still Used

Chinese are passionately fond of the drama, and in every Chinese town and village, plays are every day occurrences.

In the big cities the theatres are always full; in the small towns and villages the plays are generally acted in the middle of the road by travelling companies, who bring their properties with them. The site chosen is often in front of a temple, says a correspondent to the London Times, so that the gods can get a good view. Any great national feast day will be the occasion of a play; or some local dignitary will have a company to perform before him.

The old plays, written hundreds of years ago, are still the plays of today. Every one in the audience knows the plot and most of the words of a play before he goes to it. Acting in consequence consists in the making of formal gestures to represent certain actions and emotions; there is no attempt to make a play realistic. All gestures have become crystallized to such an extent that there is a definite gesture for every emotion. Thus the whole interest of the play lies in the presentation of what is really a very slow and stately ballet, designed rather to delight the eyes than to excite the emotions.

Here it is that the orchestra comes in. Besides accompanying the singers, it has to beat time for almost every movement of the actors. A man raises his hand, the cymbals clash together; he takes a step forward, the gong is rung; he finishes a phrase, a drum is beaten.

While not every movement and phrase are thus punctuated, all Chinese love a noise, and they will sit for hours with gongs and drums going incessantly. The violin and the castanets or the flute accompany the singers, though occasionally the drums join in, and the cymbals, drums, and gong mark the movement of the actors. Thus, at almost every movement some instrument is at work.

A Chinese actor moves as no European or American. He glides about the stage. The most famous actor of the present time, Mei Lanfang, seems to float on air. Every one of his movements, however insignificant, is perfect. Mei Lanfang always takes female parts, like nearly all the most famous Chinese actors.

It Might Be Managed

President Of Film Company Had Helpful Suggestion

One of the "classic" stories of Hollywood is about the President of one of the big film companies who visited his studio on one of his semi-annual inspection trips. Walking up to one of the stages, he noticed a wolf being "shot" by a cameraman.

"Stop!" he ordered! turning to the director. "For why you have this wolf in this picture? A wolf looks like nothing. For why don't you have a lion—that's an animal?"

"But this scene is supposed to be in the Northwest," explained the director. "It's out in the woods—where you'd naturally expect to find a wolf. A lion wouldn't be found in this part of the world—up in the Canadian Rockies."

"A lion would look much better in the picture," insisted the film magnate.

"But how could a lion get up in the Northwest?" protested the director. "We have to be logical."

"Well, couldn't he have escaped from somewhere?" suggested the film magnate, trying to be helpful.

Tons Of Shells Exploded

Loaded with ammunition, a motor lorry travelling from Birmingham to London burst into flames. They kept bursting for three hours and roared like an "artillery bombardment." In the midst of the explosion was the driver of the lorry, who, with a heap of shells, had been flung through the windscreen. He was killed, and four others who tried to rescue him were badly burnt.

The Stubborn Brute

The bride of two weeks came to her mother weeping bitterly.

"What's wrong now?" asked mamma.

"John's so stubborn," replied the daughter.

"Stubborn?"

"Yes—he—he says he don't want—don't want to have a — big church funeral when he dies."

Schuyler: "You should always say 'Thanks' whenever anybody gives you anything."

Berger: "How about when a person gives you a pain?"

American machinery leads in South Africa, according to investigations of manufacturers.

Nerve Tests For Airmen

French Pilots Put Through Examination Every Six Months

All the sensations most aviators get in a lifetime are reproduced in a special laboratory at Le Bourget, where pilots are put through an examination.

Every man who takes a machine out of the aerodrome is put through a test every six months. First of all, the pilot is seated in a gyroscopic chair, which is swiftly revolved to test his sense of equilibrium. Then he has to walk ten yards in a straight line with eyes closed, balance himself on his toes, and stand on one leg and give a "high kick" with the other without staggering.

Nervous reactions are recorded electrically by various devices when the lifter, blindfolded and seated in another pivoted chair, is suddenly tipped back and forward without warning.

Quickness of vision and thought are determined by an electrical timer which records how many hundredths of a second it takes a man to press a button after a signal light has been flashed in a dark room.

The effects which various altitudes have on the pilot are noted by placing him in a sealed steel and glass chamber, from which air is expelled to reproduce the atmospherical conditions at all heights up to 36,000 feet, which is approximately the world's altitude record. The temperature falls three degrees Fahrenheit for every 1,000 feet of altitude.

At 12,000 feet most people begin to feel headachy and their hearts begin to play tricks; at 15,000 feet it is impossible to whistle; and at 21,000 feet a ringing bell cannot be heard. It has been found that a telephone ceases to operate at this height.

The doctors at Le Bourget claim that there has been no accident in the air through physical collapse of pilots who have been periodically examined at the laboratory, and it has been suggested that, if motorists were subjected to a similar system of intensive examination, the number of road accidents would be speedily reduced.

Warm Feed For Hogs

Methods Of Feeding Meal To Pigs In Cold Weather

That it pays to give pigs warm feed in cold weather was shown in a test made at the Kentville, Nova Scotia, Experimental Station. The pigs were divided into four lots as equal in weight as possible. Each lot received an equal quantity of meal, roots, and milk, and had access to water as required. The methods of feeding the meal however, were different for each lot. Lot 1 received meal fed dry and lot 2, meal in water slop fed cold. Meal soaked from one feed to the next was fed cold to lot 3 and warm to lot 4. The lot fed dry meal did not do as well as the three lots fed slop. Lot 4 did best, indicating that for cold weather warming the feed is profitable.

If men were compelled to bury their faults the undertakers would have to work overtime.

Too many men who have good ideas are unable to make good.

Banff Claims Youngest Musher

Banff claims the youngest western musher. Miss Gertrude Steele is the young lady's name. Morning ablutions and breakfast over, this ambitious three-year-old dons her outdoor togs and bids forth in quest of Jack, her faithful steed and companion. The latter is usually waiting around for his little mistress so she leads him to the sleigh where he stands patiently whilst she harnesses him. After making sure all is right, Miss Gertrude walks to the rear of the sleigh, then —"Mush Jack" and away they go.

Some time later, cheeks rosy from the run through the exhilarating air, the youthful musher returns home. "Where have you been?" asks mother. "Oh! Me and Jack mushed down to the depot to see the train come in," or, "Me and Jack mushed to the Cave and Basin," is generally the reply. She mushes, too, to the grocer's, the butcher's and anywhere mother may need her to go. Gertrude and Jack are inseparable, morning and afternoon they are seen on the streets of Banff. Canada's youngest musher is being seen in action during the Banff Winter Carnival at present taking place.

WHERE VEGETABLES ORIGINALLY CAME FROM

Things People Eat Every Day Gathered From Many Countries

If a census were taken on the subject of vegetable preferences, the humble potato would probably receive the blue ribbon.

The potato, like a number of other vegetables, reached Britain's shores after romantic adventures, says an article in Tit-Bits.

Three centuries ago Sir Walter Raleigh brought the potato from Virginia. Some of the tubers were introduced to Ireland, where they grew and multiplied, furnishing Erin with her staple product. Later a ship carrying potatoes was wrecked off the Lancashire coast. The fisher-folk planted the tubers washed ashore, and the potato soon became an everyday article of food.

The Romans introduced the turnip to these islands, producing in their own country specimens which, according to ancient chronicles, weighed forty to fifty pounds each.

The cucumber is older still. It was in everyday use in China centuries before the birth of Christ. It seems to have been known first in India, which would seem to prove that it flourished there before the dawn of recorded history.

From Peru comes the tomato, which originally grew wild on the seashore. The Peruvian gardeners cultivated it with such care that its fame spread first to Mexico and later to Europe.

Broad beans and green peas came from Asia Minor.

An Englishman travelling in Egypt about the end of the sixtieth century, noticed a vegetable which was common enough to the Egyptians but with which he was unacquainted. It was the cauli-flower. With some difficulty he procured some seeds, which he intended to try to grow in England. They were lost in transit, however, and so the cauliflower was not made known to us until a century later, when it was brought over from Germany.

The carrot once grew wild in Greece, where it was used only as fodder for cattle and food for bees. Gradually its use as a vegetable became known in Greece, and at a later date in Britain.

Parsnips were similarly despised until a short while ago, and shallots brought over by the Crusaders were grown merely as a useful and effective antidote for snake-bites.

Travellers from Asia introduced the onion. The best imported onions come from Brittany, Tripoli, and Madeira, being of more delicate flavor and texture than the Spanish variety.

May Destroy "Pillar Of Salt"

The famous "Pillar Of Salt," identified as being "Lot's Wife of the Old Testament" story, is reported to be in danger of being torn down for the manufacture of salt by the people holding the concession to work the Dead Sea deposits. The threatened extinction of this noted pillar is causing dismay in many quarters.

Bookkeeper: "My salary is not what it should be."

Office Boy: "But do you think you could live on it if it was?"

Standard rails weigh from 120 to 140 pounds per yard.

Scientific Survey Of Arctic Area Planned

Nobile Proposes To Spend Several Weeks Studying Climate

General Umberto Nobile, designer, constructor and pilot of the airship Norge, in which the expedition of Captain Raold Amundsen, Lincoln Ellsworth and General Nobile voyaged from Spitzbergen to Alaska over the North Pole in 1926, has left for Germany and Russia to make final arrangements with the Governments of those countries for the Italian airship expedition with which he proposes to make scientific studies in the polar regions this summer.

General Nobile's plan is to conduct a thorough scientific survey of the Arctic regions. Contrary to what was done the last time, when the whole effort was concentrated on the dash across the polar waste from terra firma to terra firma, he proposes to remain for several weeks in the Arctic zone studying temperatures, climatic conditions, ocean winds, magnetic compass variations and other phenomena, a knowledge of which in addition to having high scientific interest, would also have a practical application, because these things affect the possibility of establishing air lines from America to Europe across the top of the world.

But all this requires the establishment of a permanent base at Spitzbergen, which, by courtesy of the Norwegian Government, is now being prepared. From this base, General Nobile plans to make repeated flights over the polar regions, possibly ending with another attempt to reach Alaska.

With the exception of mechanics to tend the engines, the crew will be composed entirely of scientific men, who will take the observations which are the real object of the expedition.

London Shops Have Queer Restrictions

May Sell Apricots During Evening But Not Nut Apples

Uncooked tripe may be bought in England until 9.30 p.m., but cooked tripe not at all in the evening, according to the report of a Government committee which has been investigating early shop closing emergency regulations which came in during the war.

If the committee has its way about the restrictions they might be tightened up a bit and neither uncooked nor cooked tripe could be bought from a retailer after 8 p.m. The regulations apply to tobacco, confectionery, prepared foods and other articles and the Government plans to re-arrange the restrictions for the benefit of the public.

There are many difficult obstacles to be overcome, the committee points out, calling attention to the fact that under the existing laws fruit sellers may sell apricots but not apples up to 9.30 p.m. The committee's way of looking at it would be to forbid the sale of both apples and apricots after 7 or 8 p.m.

Wild Turkeys For B.C.

Game Board Has Imported Three As An Experiment

Three distinguished and very unusual visitors have arrived at Victoria bearing the name of meleagris gallipavo feris. But that, according to Major Turner, chief provincial game inspector, is only the registered name. More commonly, the visitors are known as wild turkeys.

There are only three of them—two gobblers and a hen—but Major Purber hopes that they will be the nucleus of a colony which in years to come will number thousands.

Introduction of wild turkeys to Vancouver Island is another experiment of the British Columbia Game Board, which recently introduced muskrats and mountain sheep and goats to the island. The birds have been liberated at the Game Board's farm at Elk Lake, where care will be exercised to keep them in good health and special precautions will be taken to protect the young birds. The wild turkeys were brought from Ohio.

Could Make It Speedy

Uncle Ben dosed peacefully in his chair on the porch of the general store. Down the street tore a battered yellow flivver racer, adorned with pennants and slogan plates and rattled to a stop in front of the store.

"Hey, Uncle," bawled one of the occupants, "any speed limit in this town?"

Uncle Ben spat wraithfully into the dust. "Speed limit?" he squeaked. "Dang it, no! You fellers can't git yerselves through this town half fast enough t'suit us!"

Shakespeare's handwriting was very hard to decipher, and was unscholarly in appearance.

Fruit Growing On The Prairies

Optimistic Opinion Is Given On the Subject Of Fruit Growing In the West

Fruit plantations and good, well flavored fruit yields soon will be the rule instead of the exception on Canadian prairie farms, in the opinion of W. R. Leslie, superintendent of the Dominion Experimental station at Morden, Man. Mr. Leslie made this prediction in an address broadcasted from the Western Soil Products exhibition, in Winnipeg. He told how fruit stock could be obtained and successfully cultivated, and declared persons interested in the experimental side would find it a fascinating pursuit, with strange and remarkable variations resulting from cross strains.

Mr. Leslie asserted an important start had been made in developing the sorts of apples, crabapples, plums and cherries which would flourish best on the prairies. This was no more than had to be done in any new territory, not even excepting the famous fruit growing districts of Quebec and Ontario. Now that many types had been obtained which were "comfortable" in prairie gardens, he expected early progress in the quality and quantity of fruit produced.

As an example of the thrills of surprise which might be expected in fruit grown from seeds, Mr. Leslie mentioned an apple of Russian origin. Its seedlings had matured fruit ranging from small crabs to apples more than three inches across. Among them were red, white, green, yellow and russett, including sour and sweet, acid and flat.

Plums were yet more eccentric, as they had to be cross-pollenized. This often was done with apricot pollen from flowers grown in pots.

Cherries were crossed with sand, pin and choke cherries on the Morden farm.

Altogether more than 4,500 plum seedlings and more than 6,000 apple seedlings had borne fruit at Morden Experimental Station.

Morden was not specially favored in climate he claimed. Similar fruits were bearing all through the prairie, though only in scattered districts to date.—Free Press.

Farm Canadian Way

Campaign In Argentina To Adopt Canada System Of Grain Handling

A nation-wide campaign for the adoption of the Canadian grain elevator system and grain marketing procedure in Argentina was inaugurated by Luis Duhua, the president of the Rural Society of Argentina.

Mr. Duhua, who last year personally studied the distribution, storing and marketing of crops in Canada, believes that the adoption of the Canadian system is the only way to save the Argentina grain grower from the exploitation by dealers, through whose hands practically the entire Argentine grain crop passes before it reaches the miller or foreign buyer.

Another Foolish Idea

A Riga despatch to the London Daily Mail quoted the Bolshevist newspaper, the Soviet Woman, as announcing that little Russian girls must not play with dolls. Dolls, it was asserted, represent the bourgeoise idea of family life, awaken a love of motherhood and develop a taste for household duties, and therefore the Women Teachers' Union has banned them.

Would Welcome Fisa

Great Britain would welcome as arrangement between the allied powers and Germany whereby a general evacuation of the Rhineland could be carried out before the period set in the Treaty of Versailles, Godfrey Locker-Lampson, under secretary of the Foreign Office, declared in the House of Commons.

"Has that powder to prevent your husband from drinking done any good?"

"It tastes so nasty that he will only take it in a quarters of brandy." — Pages Gales, Yverdon.

Don't dose a Child's Cold

CONTINUAL dosing upsets children's delicate stomachs.

Vicks is applied externally and therefore cannot disturb the digestion. It acts in two ways:

(1) The body heat releases the ingredients in the form of vapors which are inhaled.

(2) At the same time Vicks "draws out" the soreness like a poultice.

VICKS VAPORUB

The Fall Of Trotzky

Faces the Cruel Punishment Of the Old Autocratic Government

There are many ironies in the exile of Trotzky to Siberia.

There is the irony that he who next only to Lenin, was the main creator of the Soviet regime, is now crushed and rejected by it.

There is the irony that he follows the way of the helpless Czar whom he sent to his death at Ekaterinburg.

There is the irony that, in facing Siberian exile, he faces the cruel punishment of the old autocratic government which every Russian liberal for a century has vowed to end.

And there is the final irony that the world at large will take from the exile of Trotzky all sorts of valuable lessons of the exact kind which neither he nor the Soviet tyrants will want it to take. — New York Post.

Goodwill Tours To Europe

Members Of Parties Will Take Own Cars and Motor Through Europe

A friendlier feeling between Canadian, American and European motorists which, in turn, will be transmitted to a much wider circle of people on the two continents will, it is hoped, be engendered as a result of two personally conducted "goodwill" tours to Europe this summer organized by the White Star Line under the official auspices of the Montreal Motorists' League, it is stated in an official announcement by the White Star Line.

A novel feature of the tours will be that those going to Europe with these parties will take their own cars and motor through Europe and Great Britain.

Wherever they go receptions will be arranged in the principal cities and it is anticipated that the Touring Club of France, and the Automobile Association of Great Britain, with which the Montreal Motorists' League is affiliated, will tender official receptions to the parties and, in this way play their part in promoting goodwill between Europe and the North American continent.

Already there have been inquiries from Winnipeg, Vancouver, Toronto, several cities in the province of Quebec, Ontario and Manitoba, and with the announcement of these tours in the United States it is expected that there will be a regular string of requests from American motorists.

One of the principal ideas underlying these parties is to persuade Canadian and American motorists, who already have much in common, to travel across the ocean together and, by personal contact with motorists in Great Britain and in Europe, build up a firmer feeling of friendship between the people on the two continents.

The first party, with their own cars, will sail from Montreal on the White Star liner "Megantic," on July 26, and return from Liverpool on the White Star liner "Calgaric," on August 31.

The second group will sail from Montreal on the White Star liner "Albertic" on September 6, and return from Southampton on the same steamer on October 20.

Both these parties will follow practically the same itinerary, landing at Havre and motoring thence to Rouen, through the Canadian battlefields by Arras of Vimy Ridge, the Somme, Lille, Tournay, Mons, Charbrai, St. Quentin, Compiegne to Paris where several days will be spent, then by way of Chateau Thierry to Rheims, Verdun, Luxembourg and Treves, Cologne, Aix la Chappelle, Brussels, Antwerp, Amsterdam, The Hague, Rotterdam, and then by steamer to Harwich from where the party will make a circular tour of England and Scotland.

Vermilion Map Sheet

Marked Changes From Early Days Is Shown By Aerial Survey

A score or more of years ago one travelled from Saskatoon to Battleford and Edmonton and there were no intervening settlements. The gopher and the badger had their way with the land and viewed with a placidity born of ignorance the straggling parties of surveyors at work on laying out the farms of the next generation.

Today most of these areas are filled with settlers. The stupendous change that the years have brought is clearly pictured in the latest edition of the Vermilion Map Sheet, located seventy-five miles south of Edmonton, now on the press of the Topographical Survey, Department of the Interior, Ottawa. The wilderness that was, has been made to blossom into something distinctly more profitable than the rose. An area of eighty-four miles east and west by forty-eight miles north and south is, except in three wooded townships, settled to the extent of one farmstead to the quarter-section in many cases.

The new map will be of incalculable use to prospective settlers, travellers, business men and others, shown on it are farmhouses, schools, roughly four miles apart, churches, grain elevators, post-offices, towns and villages, telegraph offices, telephone lines and railroads.

Also clearly indicated in different colors are the main roads, secondary roads and lesser travelled trails along which canters the ubiquitous motor car where formerly the buffalo alone ranged.

Traversing the region from east to west are the trough-like valleys of the North Saskatchewan and the tortuous Vermilion. Many small lakes and lesser waterways, both ornamental and useful, brought to light by the photographs of the Aerial Survey, have been mapped.

The 1885 rebellion is recalled in the location of the site of the Frog Lake massacre.

Old Violins

Three Genuine Stradivarius Are Found In the Ottawa District

Three genuine Stradivarius violins have been located in the Ottawa District. In most cases they fell into the possession of their recent owners when they were purchased for a song." Mrs. E. Jamieson purchased a violin six years ago from an old gentleman for $10. The words "Antonius Stradivarius Cremonensis Faciebat Anno 1716" are inscribed on the inside of the instrument, which she purchased for her son to practice on.

W. L. Weaver, of Mountain, Ont., purchased the violin, which he claims to be a Stradivarius, 18 years ago in New Ontario, from a Hungarian who was in straitened circumstances. It bears the same inscription as the violin owned by Mrs. Jamieson but is dated 1736.

The third violin is in the possession of John Pumfrey, of Camden township. His violin has been pronounced genuine by experts. He values the instrument at $15,000 and has refused $10,000 for it.

Cancer Research

Too Much Secrecy Adopted By Those Engaged In This Work

Dr. Charles H. Mayo, famous surgeon, of Rochester, Minn., finds too much secrecy enshrouding research work of cancer cures. "Too much secrecy, that is the main drawback in the search for a cancer cure as it is now being conducted by research scholars throughout this country," said Dr. Mayo. A government program of unified research, such as was outlined in Chicago recently at the American medical association meeting by Surgeon General Hugh S. Cuming, of the United States public health service, was advocated by Dr. Mayo as a means of casting off the "secrecy and mystery" in which research scientists have shrouded their experiments on cancer.

Green fruit may be ripened in a few hours by means of ethylene gas.

Little Helps For This Week

"Forgive, if ye have ought against any, that your Father also which is in heaven may forgive you.—Mark xi. 25.

Gently I took that which ungently came,
And without scorn forgave; do thou the same,
A wrong done to thee think a cat's-eye spark,
Thou would'st not see were not thine own heart dark.
—Samel Taylor Coleridge.

Does any man wound thee? Not only forgive, but work into thy thought intelligence of the kind of pain that thou may'st never inflict it on another spirit.—Margaret Fuller.

Life appears to me too short to be spent in nursing animosity or registering wrong.—Charlotte Bronte.

Children suffering from worms soon show the symptoms, and any mother can detect the presence of these parasites by the writhings and fretting of the child. Until expelled and the system cleared of them, the child cannot regain its health. Miller's Worm Powders are prompt and efficient, not only for the eradication of worms, but also as a toner up for children that are run down in consequence.

No Ladies Allowed

Bachelor's paradise, as Tavistock Hotel, Covent Garden, London, was known in the last century, has closed its doors, and the contents have been sold by auction. No woman was allowed within the hotel's doors, and it was practically a man's club. The long dining room is said to have been a favorite haunt of Dickens, Thackeray and other notable men.

Minard's Liniment for asthma.

So far nobody has been able to raise the chinchilla successfully in captivity as these animals are very quarrelsome and usually kill each other or the young.

A Texas chemist has declared the material value of the average human being to be 98 cents.

Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggists.

PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER XIX.—Continued.

His house of branches was replaced by a little log shanty, with a home-made fireplace built of stones from the river, and into it he moved before winter. In the spring he returned to civilization with his season's catch of furs. After that his victory was assured, and if he had been more sociable and friendly he would have received the admiration of the settlement at Bannerman. As it was he did his trading almost silently, volunteering no explanation of his strange ways; and no man can gain the confidence of his fellow men unless he is willing to explain himself.

The year before the war, the Englishman had built a shingled bungalow, with glassed-in verandah, and hardwood floors. He had built-in cupboards and furnished it in such a manner that many a man living in the settlement was subject to drastic questioning by the wife of his bosom, who drew pointed comparisons between the house she was forced to live in and this one. Why was it that a crazy Englishman who lived alone but for his dogs, could afford such luxuries as these, while whole families were still living in congested quarters? Matters grew still more unpleasant when it was rumored that he was going to pipe the water from a lake in the mountains to his house.

The only explanation the harrassed husbands could think of, and it did not entirely satisfy, was that the man must be receiving money from home. No man could do all this on his fur catches.

It was Bill Larsen, the Swede, who conceived the idea of visiting this new house, and to this end organized a fishing party on Sunday morning in the spring of the year. English River abounded in mountain trout, and it was easy to get a party together to go out. They could ask permission to hold a kettle and in that way get in to see the house.

The party came back late that night registering complete success. He had not only asked them to come in, but had cooked a meal for them—roast chicken, canned figs for dessert, white cloth and everything.

"Did he ask you all to come again when you couldn't stay so long, or anything like that?" asked Jim Simpson, incredulously. Jim had opposed the fishing party.

"He doesn't need to ask us back when he fed us that well. We'll go all right—eh, boys?" replied Bill; "vittles like that speak for themselves—we've gotta' next Sunday again. Gosh, Jim, you better come—he's tickled to see us, I believe. He's not quite all there—anyone can see that, he's so polite and ladylike—and we might as well punch a meal ticket on him as not."

The parties continued for several weeks, growing in number, and never did the hospitality fail. Fried lake trout, home-made bread and butter, eggs, and wild fruit were plentifully supplied and eagerly consumed.

"Gee! that fellow is easy," Bill Larsen was often heard to say; "he seems pleased to do it, and never seems to mind that none of us offers to help him clean up or anything. Well, some people like work, and I'm not the one to try to deny their fun. He don't even know when we're laughing at him!"

The next Sunday their host was as generous as ever, but when the meal was half over, apologized for his haste in clearing the table. Usually he waited until his guests were gone, but today he was going out and if they would be so kind as to excuse him he would proceed to wash up while they were eating. It was Sunday, which on this day was wild strawberry pie. The visitors winked at each other behind his back. Think of any human being asking leave to wash his own dishes! "Oh, sure! he would excuse him providing he didn't rattle the dishes too much and disturb the speakers." This was from the barber, who was the humorist of the party.

Even at that their host politely replied that he would be most careful. He then gathered up the plates and laid them in a row on the sun porch, his visitors watching him with interest. They were in radiant mood. This fellow grew chivier all the time. What funny work was he up to now?

The Englishman opened the verandah door and called. Four collie dogs came bounding in. He motioned to them to begin operations on the plates, which they did with eagerness. When they had made a thorough job of cleaning them he ordered up the plates deliberately and arranged them in one of his many cupboards.

"They save me a lot of work," he said, more to himself than to his guests, on whom a silence had fallen; "and they polish the plates very well indeed, and the pots and pans as well."

There was an understanding on the way home that no reason would be given for discontinuing the visits.

"Now, boys, said the barber, "that's what might be called tact. He didn't tell us we had worn out our welcome—just intimated it. I kinda wish he had waited until we had finished that pie! Wild strawberry pie! I never thought anything could turn me from wild strawberry pie. That fellow is not such a fool, after all."

"Well, I am going," said the Englishman to Jim Simpson; "I am going today. My only regret is that I did not know sooner. Will you buy my horses — the whole outfit as it stands?"

"What did you do with your fine house and all that furniture?" asked Mr. Simpson, cautiously.

"Left it—left it—locked the door and came out. Gave one dog away—shot the others. I couldn't shoot old Cleo, I tried but I couldn't."

"Good Lord, man, you're crazy! Them were dandy dogs? What in thunder did you want to shoot them for—I thought you were a real dog man."

"No one will ever abuse my dogs. I wanted to be sure, that's why. I gave the Ransom's a horse, and they promised to care for Cleo as long as she lives. What will you give me for the horses? Be quick now!" He had no time to argue—he was going on the train that day.

"One hundred dollars for the whole thing," said one of the men.

"Very well," said the Englishman. "I'll take it. Be good to them."

He went to the boarding house for dinner, where he was the centre of curious eyes, for the story of his wild intention was known. When he had eaten a hasty meal he stood up suddenly and broke into speech.

"Boys, you are wrong," he began. In going on mining coal and thinking you do not need to hear the call your country has sent out. The British Empire is threatened, her enemies are at the gates. Belgium, a little country, has been violated. While you sit here, villages are burning, women are screaming—and the Germans are marching triumphantly on. Have you no pride, no manhood? . . . . I know the Germans . . . they have been getting ready for years. Lord Roberts told the Empire to get ready—It was coming—but they went on like you—"business as usual"!

He paused here, overcome with emotion. One or two of the men laughed, the others regarded him stolidly. Crazy Englishman! Crazier than ever!

"Well, say, looks here," began Bill Larsen, "what are you gettin' so het up over, I'd like to know." Bill, although the proprietor of the "Grand Pacific," a hostel licensed to sell milk and spirituous liquor, and presumably a place of refreshment for man and beast, made no pretence of supplying meals even for himself, and took the monthly rate from Mrs. McMann. "What's bitin' you? Go yourself if you want to—who's holdin' you back?—but what's the call for abusin' us because we don't want to stand up and stop bullets. My old granddad fought in the American war, and he got his fill of it, I'll say! —lost an eye and a leg, and four dollars a month of a pension from his grateful country! It don't look like a safe proposition. How do you know who's right? Your British Empire wasn't dandy right when it came to the little run-in with the United States. How do you know she's right this time?"

(To Be Continued.)

Islands Make Final Payment

Final contributions of Jersey and Guernsey to the cost of the great war have been received in London. Jersey's contribution amounted to £500,000, and a cheque for that amount was received at the Treasury. Guernsey's cheque was for £200,000 and was received at the Home Office. The two sister isles made simultaneous final payment by previous arrangement between themselves.

A poet has discovered perpetual motion. The magazine editors send him back as much as he sends them.

The motorist has the right-of-way and the pedestrian has what's left.

LESSON No. 16

Question: Why do growing children, *particularly girls,* need emulsified cod-liver oil?

Answer: Growing children, and particularly girls, need vitamin-rich nourishment *to help them through* critical stages of extreme tax on their strength.

Pleasantly flavored, easy to take, children like

SCOTT'S EMULSION

OPERATION LEFT HER VERY WEAK

Letter Tells of Wonderful Relief After Taking Lydia E. Pinkham's Vegetable Compound

Comiston, Ontario.—"After a severe operation and a three weeks' stay in a hospital I returned home so weak that I was unable to move a chair. For four months I was almost frantic with pains and suffering until I thought sure there could not be any help for me. I had very severe pains in my left side and suffered agony every month. One day when I was not able to get up my mother begged me to try your medicine. My husband got me a bottle of Vegetable Compound at once and I took it. I started a second bottle, and to my surprise and joy the pains in my side left me completely and I am able to do all my work without help. I am a farmer's wife, so you see I can't be idle long. In all, I have taken six bottles of Lydia E. Pinkham's Vegetable Compound, five boxes of the Compound Tablets, two bottles of Lydia E. Pinkham's Blood Medicine, and have also used the Sanative Wash."—Mrs. L. LAMBORNE, Box 102, Comiston, Ontario.

During the past week it has been discovered that some boys with matches have been starting fires in the grass around town. We would remind parents that this is a penalty of $50. for startig prairie fires.

* * *

Mr. and Mrs.J. McLachlan and family of six children arrived in town this week from Saskatchewan. Mr. Mc Lachlan purchased a home on Firstreet from the town and has decided to reside here. About six years ago Mr McLachlin farmed in the East Spring district.

* * *

Two small boys appeared in the Juvenile court here last FFriday evening before Magistrate Ellis. The boys pleaded guilty o entering a house in town and taking some money They also admitted purchasing goods and having them charged to individuals without authority. The boys were allowed their freedom on condition that they report every week to he local police and attend school regularly. The case showed that parents would be well advised to keep a close tab on the doings of their children.

CARD OF THANKS

The ladies of St. Mary's Church wish to extend their hearty thanks to all those who so liberally patronized their tea and sale of work last Saturday afternoon.

IN MEMORIUM

In loving memory of Mr. Harry Murphy, who died March 22nd, 1927.
Gone but not forgotten, Will ever be remembered by his friends, Grace McLaren and Miss I. E. Eckman.

IN MEMORIUM

In loving memory of my wife who passed away March 30th, 1927.
Days of sadness still come o'er me,
Tears begin to flow,
For the memory that keeps you near to me,
Though you left us a year ago.
Inserted by her husband,
F. M. Hurlbert.

Here and There

Another barometer of the state of Western Canada's agricultural progress is the sale of school lands in the Prairie Provinces which in 1927 were the best on record. In 1 483,403 acres were disposed of for a total of $8,903,907, representing an average of $18.70 per acre. The lowest price obtained was $ per acre and the highest $79.

Appointment was announced recently of R. P. Angus to be assistant superintendent of the C.P.R. Montreal Terminals. Mr. Angus, who joined the Canadian Pacific Railway as a clerk in 1919, is the grandson of R. B. Angus, one of the creators of the system, and nephew of Sir Vincent Meredith, chairman of the Bank of Montreal.

* * *

Ten-year-old John Wyllie Barbour travelled recently alone from his aunt in Los Angeles to his father in Glasgow, a distance of about seven thousand miles, in care of C.P.R. train and boat official from Chicago on. John thought the climate here was little different to California and were no more at home had left it packed in his trunk, but the ship's mird at Montreal where he struck sub-zero weather He arrived safe and sound, and will come back in the spring.

A paradise for the outside camper will be ready next summer when the government finishes the new camp ground in the Rocky Mountains Park within half a mile of Banff, o Tunnel Mountain. The camp, which on the old site last July accommodated 11,653 persons, is specially popular among prairie farmers between seeding time and harvest. Charge is only a dollar for a party for three weeks, and running water, garbage removal, dinner shelters, electric light and even pay telephones are provided for campers.

* * *

Around ten thousand snowshoers and their friends will visit Montreal on the occasion of the 20th anniversary of the founding of the Canadian Snowshoers' Association to be held in Montreal February 3-6 The convention is international in scope since at takes in the American Snowshoers' Association with over 1,500 members in the states of New Hampshire and Massachusetts, while there are also representatives from the Manitoba Snowshoers' Association and local bodies from all over the province of Quebec.

* * *

Making his second visit to Canada in 44 years, Seymour Hicks, noted British actor, with his wife, the equally well-known English stage favorite, Ellaline Terriss, and their daughter Betty, with a company of 36, arrived at Halifax this month, played a week there and three days at Saint John as the opening phase of a four months' tour that will embrace the whole Dominion to Victoria and back. Mr. Hicks travels C.P.R. and will conclude his tour May 5.

* * *

The increased buying power of the Canadian people and the surplus available in their possession for investment in the last few years is accounted for by the increased production of the Dominion, substantial increments having been recorded since 1923 and a new record made, according to estimates, in 1927. The value of gross production in Canada in 1923 was $4,940,000,000; in 1924 it was $5,263,000,000; in 1925 $5,529,000,000 in 1926 $5,856,241,024 and in 1927, according to the estimate of the "Financial Post," $5,755,796,790. Production in 1927 exceeded that of 1926 by approximately $100,000,000 and that of 1923 by $809,000,000. Agriculture accounted for $1,660,387,100; forestry $480,405,000; fishing $89,291,030; trapping $16,789,000; mining $262,755,000; electric power $108,195,000; construction $308,200,000, and manufactures $2,760,700,000.

THE HICKS TRADING Co.

"More settlers are coming from the United States to make homes in Canada than in any year since 1920," said J. R. Ryan recently in Winnipeg, travelling colonization agent from the St. Paul office of the Canadian Pacific Railway. "Personally," he said, "I have brought 70 families this season and have every reason to believe that the total will be well over 100 before the end of the year. All the settlers have money—some very well supplied."

Prof. Robert Wallace, commissioner of Manitoba mines, told the Caledonian Society at its weekly luncheon in Winnipeg recently, that mining developments such as had never been equalled in the history of Manitoba were likely to feature the next six months. Mining, he said, had to be looked upon as a business proposition. It so happened in this country that mines are found in places to which access was not easy and no railroad could be expected to lay tracks into the north country until it knew prospects there.
